845 Comfort Panel LED - Tunable white

The superior quality of LED lighting is now more accessible thanks to a benchmark product that offers, at reduced costs, the ideal light for offices, shopping malls, hotels and in general all those spaces that need constant lighting.

Comfort Panel comes in either a square or rectangular shape that can be easily installed into ceilings. It is equipped with fast connectors, avoiding the need to open the unit. Its shape guarantees uniform light distribution, while the white-light LEDs generate high light quality, ensuring the best visual comfort. All this comes with significant energy savings

Housing: in sheet steel, contact mounting on the cross T structure.
Diffuser: in opal engineering plastic with high thermal transmittance.

Wiring: rapid wiring connection, the fixture does not need to be opened.

TUNABLE WHITE: is a lighting solution capable of reproducing the natural course of daylight thanks to an exclusive colour temperature dynamism system. Based on specific needs or architectural solutions, users can change the colour of lights without changing the lamps or fixtures.

Perfect colour temperature setting, from 2700K to 6500K, not only improves perceptual quality, but also creates amazing visual effects, it enhances colours and helps regulate the body's biorhythm.

LED 2700-6500K - 9800lm - CRI>80
