Emergency 1

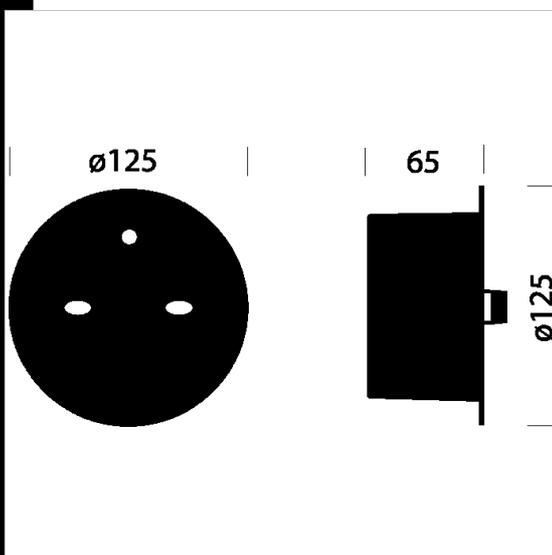

Emergency lighting is an essential safety system to ensure the protection of people during emergency situations.

People who are left in the dark during power outages or block-outs, especially in crowded places or during a catastrophic event, will feel uneasy, hence increasing the risk of getting hurt because uneasiness can easily turn into panic.

Therefore, an efficient emergency lighting system is an essential requirement to guarantee a safe and fast evacuation during emergencies.

If this system is designed in compliance with existing laws and regulations, it will provide the necessary aid that, together with adequate safety signals, will ensure a smooth evacuation from the premises.

22170918-00 EM 1h - 7.2v 800mA - 3W
22170919-00 EM 3h - 7.2v 1000mA - 3W

Code	Gear	Kg	Lumen Output-K-CRI	WTot	Colour
22170918-00	CLD CELL-E	0,37	LED---	4 W	BIANCO
22170919-00	CLD CELL-E	0,37	LED---	4 W	BIANCO

The reported luminous flux is the flux emitted by the light source with a tolerance of $\pm 10\%$ compared to the indicated value. The W tot column indicates the total wattage absorbed by the system without exceeding 10% of the indicated
